

Heidelberg University Hospital provides all medical treatment options. The immediate proximity of the departments to each other enables interdisciplinary diagnosis and therapy. Common as well as rare and complex disorders can be treated fully and efficiently.

Regular medical care is frequently accompanied by clinical trials that are conducted in all departments with the aim of developing new diagnostic and therapeutic options. Patients at Heidelberg University Hospital consequently have access to treatment options that are otherwise provided by only a very few centers worldwide.

You will find a brief presentation of the main areas of expertise in all our specialist departments here. If you do not find the information you are seeking, please **contact us**.
