

Heidelberg University Hospital

WORLD-CLASS DOCTORS – YOUR GUARANTEE FOR CUTTING-EDGE MEDICAL CARE

HIGH-END MEDICINE REQUIRES HIGH-END MEDICAL PRACTITIONERS

Hundreds of thousands of patients from Germany and all over the world put their trust in Heidelberg University Hospital's doctors:

- > World-renowned medical professionals practice medicine at Heidelberg University Hospital, many of whom are among the leading experts in their fields internationally.
- > All our experts have extensive experience – particularly when it comes to treating rare and severe illnesses.
- > All our doctors are scientifically active, conducting research to develop new methods and improve existing methods. This ensures the most up-to-date treatments in line with the latest scientific findings.
- > Doctors from a wide variety of different specialty areas maintain close contacts, conferring with each other as to the best therapy for the individual patient.
- > Our specialists are well versed with the latest techniques and have the needed expertise to employ the cutting-edge medical technology at Heidelberg University Hospital.
- > All patients are treated with great kindness; the human factor never takes a backseat to professionalism.

MEDICAL DIRECTORS AND SELECTED CLINICAL SPECIALIZATIONS AT HEIDELBERG UNIVERSITY HOSPITAL:

1. **Prof. Gerd U. Auffarth, MD, PhD, FEBO**
Department of Ophthalmology
Cataract surgery, femto-laser assisted cataract surgery, premium IOLs, refractive surgery, LASIK, LASEK, phakic IOL, CLE, corneal diseases, keratoplasty, DMEK, DSAEK crosslinking, uveitis, glaucoma surgery, retinal surgery, neuroophthalmology
2. **Prof. Martin Bendszus, MD**
Department of Neuroradiology
Endovascular treatment of brain aneurysms, vascular malformations and stenoses of the cerebral vessels, cutting-edge magnetic resonance techniques for treating disorders of the brain, spine, and peripheral nerves
3. **Prof. Dittmar Böckler, MD**
Department of Vascular Surgery
Aorta surgery, carotid artery surgery, peripheral bypass surgery, peripheral artery occlusive diseases, venous thrombectomy, hybrid operations
4. **Prof. Markus W. Büchler, MD**
Department of General, Visceral and Transplantation Surgery
Pancreas surgery, colorectal surgery, minimally invasive surgery, endocrine surgery, obesity and metabolic surgery, liver and kidney transplants, liver surgery
5. **Prof. Jürgen Debus, MD, PhD**
Department of Radiation Oncology and Radiation Therapy
Conventional radiation therapy, proton and heavy ion therapy, tomotherapy, intensity modulated radiotherapy (IMRT), image-guided radiotherapy (IGRT), radiosurgery, fractionated stereotactic radiotherapy, brachytherapy, intraoperative radiation therapy, cyberknife
6. **Prof. Hendrik Dienemann, MD**
Thoraxklinik Heidelberg, Department of Thoracic Surgery
Thoracic surgery in adults and children – benign/malignant diseases of the lung, trachea, mediastinum, and chest wall (including funnel chest)
7. **Prof. Alexander Enk, MD**
Department of Dermatology
Surgical dermatology, vein surgery, treatment of skin tumors and auto-immune diseases, allergology, experimental melanoma therapy, and dermatohistopathology

8. **Prof. Volker Ewerbeck, MD**
Department of Orthopedics and Orthopedic Surgery
Joint replacement, arthroscopic joint surgery, spine surgery, bone and soft tissue sarcomas, shoulder surgery, foot surgery, pediatric orthopedics, hand surgery
9. **Prof. Matthias Gorenflo, MD**
Department of Pediatric Cardiology, Congenital Heart Diseases
Congenital heart defects, specialized paediatric cardiac intensive care unit, catheter lab with rotational angiography/MRI/cardiac CT
10. **PD Patrick Günther, MD**
Department of Pediatric Surgery
Neonatal surgery, congenital anorectal malformations, gastroesophageal reflux, solid tumors of childhood, hemangiomas
11. **Prof. Uwe Haberkorn, MD**
Department of Nuclear Medicine
Diagnostic PET scanning, diagnosis and treatment of thyroid conditions, neuroendocrine tumors, prostate carcinomas
12. **Prof. Felix J. F. Herth, MD, FCCP**
Thoraxklinik Heidelberg, Department of Pneumology
Diagnosis of all lung diseases, interventional pulmonology, endoscopic lung volume reduction, pulmonary hypertension, COPD, asthma, lung fibrosis, rare lung diseases, long term ventilation, weaning
13. **Prof. Wolfgang Herzog, MD**
Department of Psychosomatic Medicine
Psychogenic eating disorders, somatoform disorders, psychosomatic disorders
14. **Prof. Jürgen Hoffmann, MD, DMD, PhD, FEBOMFS**
Department of Oral and Maxillofacial Surgery
Tumor surgery (in the oral cavity, skin of the face, skull base), plastic/reconstructive surgery of the face, implantology, deformity surgery, craniofacial surgery, vascular malformations

15. **Prof. Georg F. Hoffmann, MD**
Department of General Pediatrics, Metabolism, Gastroenterology, Nephrology, Neurology
Metabolic disorders, endocrine diseases, diabetes, neurological disorders, developmental disorders, epilepsy (including epilepsy surgery), kidney disease (including kidney transplants)
16. **Prof. Markus Hohenfellner, MD**
Department of Urology
Prostate carcinoma, kidney cell carcinoma, carcinomas of the genitourinary system, pediatric urological tumors, robotic, laparoscopic and ultra-radical tumor surgery, reconstructive surgery, urinary stone therapy, anti-incontinence therapy
17. **Prof. Dirk Jäger, MD**
National Center for Tumor Diseases (NCT), Department of Medical Oncology
Interdisciplinary coordination of care and treatment of all kinds of tumors; innovative, modern treatment concepts in the field of oncology
18. **Prof. Matthias Karck, MD**
Department of Cardiac Surgery
Beating heart coronary artery surgery, heart valve repair, aortic surgery, heart surgery on patients with Marfan's syndrome
19. **Prof. Hugo Katus, MD, FESC, FACC**
Department of Cardiology, Angiology and Pneumology
Heart failure, cardiomyopathy, interventional cardiology, percutaneous valve replacement, interventional vascular medicine, electrophysiology, cardiac MRI, cardiac CT
20. **Prof. Hans-Ulrich Kauczor, MD**
Department of Diagnostic and Interventional Radiology
Diagnostic imaging techniques and image-guided intervention, for example in the liver, kidney, lung, breast, uterus, heart and blood vessels, oncology (embolization, ablation)
21. **Prof. Andreas Kulozik, MD, PhD**
Department of Pediatric Oncology, Hematology and Immunology
Leukemia and cancer in children and adolescents, congenital diseases of blood formation and immunodeficiencies, bone marrow transplants, severe lung disease in children and adolescents

22. **Prof. Carsten Müller-Tidow, MD**
Department of Hematology, Oncology and Rheumatology
Bone marrow and stem cell transplant, acute and chronic leukemia, lymphoma, multiple myeloma, myeloproliferative syndrome, myelodysplasia, osteosarcoma, and soft tissue sarcoma
23. **Prof. Peter Nawroth, MD**
Department of Endocrinology and Metabolism
Diseases of the thyroid and parathyroid, hormone-producing tumors including pituitary gland tumors, metabolic disorders including diabetes mellitus and its complications, osteoporosis, high blood pressure
24. **Prof. Peter K. Plinkert, MD**
Department of Otorhinolaryngology, Head and Neck Surgery (Ear, Nose and Throat)
Surgery of head and neck malignancies including laser resection and skull base surgery, rhinoplasty, corrective nasal surgery, functional endoscopic sinus surgery (FESS), endoscopy and minimally invasive surgery of the salivary glands, implantable hearing aids, cochlear implants
25. **Prof. Johannes Pöschl, MD**
Department of Neonatology
Treatment of extremely small premature infants and neonates with congenital malformations, coordination of care based on a family-centered nurturing concept, sleep lab for infants and children
26. **Prof. Gerhard Schmidmaier, MD**
Department of Traumatology
Traumas including polytrauma, reconstructive surgery in cases of interrupted healing of fractures e.g. with misalignments, bone defects, infections, revision surgery
27. **Prof. Christof Sohn, MD**
Department of General Gynecology and Obstetrics with Polyclinic
Breast carcinoma, diseases and malignant tumors of the uterus and ovary, minimally invasive operations on the lower abdomen, prenatal diagnosing and high-risk obstetrics, urogynecology including pelvic floor reconstructions

28. **Prof. Wolfgang Stremmel, MD**
Department of Gastroenterology, Infectious Diseases, Intoxication
Hepatitis, genetic liver diseases, metabolic liver diseases, steatohepatitis, liver cirrhosis and complications, liver failure, liver transplants, interventional endoscopy, digestive disorders, diarrhea, individualized therapy of chronic inflammatory bowel diseases (CED)
29. **Prof. Thomas Strowitzki, MD**
Department of Gynecological Endocrinology and Fertility Disorders
Reproductive Medicine (for example IVF, ICSI, TESE, IVM, blastocyst culture, embryoscope, polar body biopsy), endometriosis, fertility surgery including tubal and fibroid surgery, endocrine disorders, polycystic ovaries, fertility protection
30. **Prof. Michael Thomas, MD**
Thoraxklinik Heidelberg, Department of Thoracic Oncology
Treatment of thoracic malignancies, complex multimodality therapy, innovative systemic therapies (molecular directed; immunooncology), management of oligometastatic disease, novel diagnostics in thoracic malignancies
31. **Prof. Andreas Unterberg, MD**
Department of Neurosurgery
Tumors of the brain, skull base, and spinal cord; vascular malformations, complex surgery on the vertebral column and spinal cord, deep-brain stimulation for motor disorders, pediatric neurosurgery
32. **Prof. Norbert Weidner, MD**
Spinal Cord Injury Center
Comprehensive care for acute and chronic traumatic and non-traumatic spinal cord injury
33. **Prof. Markus Weigand, MD**
Department of Anesthesiology (including pain center)
High-tech anesthesia including regional procedures, intensive care, sepsis, acute and chronic pain therapy, perioperative ultrasound procedures, resuscitation techniques, sleep apnea therapy, treatment of postoperative delirium
34. **Prof. Wolfgang Wick, MD**
Department of Neurology / Neurooncology
Stroke prevention and treatment, multiple sclerosis, Parkinson's disease, epilepsy, intensive care for severe disorders of the nervous system, molecular diagnostic tests and experimental treatments and chemotherapy for brain tumors

AT A GLANCE (2016)

- > 1.100.000 outpatient visits
- > 65.000 total inpatient cases
- > 58.000 partial inpatient days
- > 43 clinical departments
- > 11 medical institutes
- > 10.300 employees, including 1.700 professors and doctors
- > 3.600 medical students
- > 500 students earned their medical degree
